

Buses and Parking at School

Buses

The school is serviced each day by buses which are the responsibility of the Transport Department. Children's departure is supervised by a staff member. Parents should arrange transport for their children directly with the bus driver and then inform the school of this arrangement.

Please contact the school office if you require contact information for bus drivers.

Parking at School

Considerable problems are experienced with traffic congestion in the school driveway during the "peak" period at 2.45 pm. For the safety of our children the following restrictions will be placed on vehicle access.

Vehicles are not permitted to:

- park on the footpath or on the grassed area between the old dental clinic and the school entrance
- park or 'stand' in the driveway in such a manner that the free flow of traffic is interrupted.

Please observe the 10km per hour speed limit and provide access at all times for school buses.

Parents are reminded that parking is restricted on Backriver Rd to allow clear access to the Children's Crossing. Parking here during the times specified is illegal and highly dangerous to the children using the crossing.

There is no vehicle access to the front of the school while the crossing is operating.
